

Obesity

Relevant articles from MA Healthcare journals to support your staff's education and practice
January 2018

Obesity is one of the biggest public health crises facing the UK today, affecting one in four UK adults. Being overweight or obese increases the risk of many other serious illnesses, such as Type 2 Diabetes, cardiovascular disease, cancer and infertility. Additionally, it can have a significant impact on a person's wellbeing and mental health.

We have provided a list of relevant articles from MA Healthcare journals dealing with this area, thereby providing your NHS staff with research, information and tips that will support both their work and their patients

British Journal of Nursing:

- Childhood obesity plan: the Government declares war on sugar
<http://www.magonlinelibrary.com/doi/10.12968/bjon.2016.25.17.984>
- Appropriate care for children with eating disorders and obesity
