Brexit issues

- **BMA Objects to Pharmacist Prescription Freedom**

The British Medical Association (BMA) has objected to new powers granted to pharmacists to change GP patient prescriptions to alternatives in the event of a 'no-deal' Brexit.

To read more [click here](#)

- **Advice for travellers**

The government has published its *latest advice for people travelling to the UK, European Union, European Economic Area or Switzerland* after 29 March 2019 in the event of a no-deal EU Exit. Until further agreements are reached between the UK and individual EU member states, the government advises UK citizens to follow this latest guidance to ensure they are fully prepared for any unexpected healthcare requirements overseas.

To read more [click here](#)

- **EU Exit operational response**

The EU Exit Strategic Commander and Medical Director for Acute Care and Emergency Preparedness has written to CCG and trust chief executives outlining the *operational response* that NHS England and NHS Improvement are undertaking at a national and regional level in preparation for the EU exit. Professor Willett's letter also includes contact information for NHS organisations to use.

Personalised care

[Putting people at the heart of the system](#) - discusses the growing movement for people to have control over their own health and care

(NHS England, 07/01/2019)

Universal Personalised Care

NHS England has published *Universal Personalised Care: implementing the comprehensive model*. This document sets out how the NHS Long Term Plan commitments for personalised care will be delivered. It introduces the model for personalised care comprising six evidence-based standard components intended to improve health and wellbeing outcomes and quality of care, whilst also enhancing value for money. Implementation will be guided by delivery partnerships with local government, the voluntary and community sector and people with lived experience.

Personalised care for older people

The Nuffield Trust, commissioned by Age UK, has published *Age UK's Personalised Integrated Care Programme Evaluation of impact on hospital activity*. This report evaluates a scheme providing personalised care for older people who are deemed to be at risk of future emergency admission. It looks at whether the programme has been able to reduce cost pressures on health and care systems and whether there has been any impact on the levels of hospital use.

[Report](#)

Health and social care: feedback from service users

Healthwatch has published *What people have told us about health and care: a review of our evidence October – December 2018*. This briefing summarises the experiences and views of over 11,000 people using health and social care services during the last three months of 2018. It highlights what the public are saying about four main areas of care and how this information is helping shape health and social care policy and practice. It also takes an in-depth look at why people are facing problems with their medication.

[Briefing](#)

Shared decision making

NHS England has published *Shared decision making: summary guide*. This guide is intended for people leading local implementation of shared decision making. It aims to increase understanding of what good shared decision making looks like; enables the commissioning of local shared decision making initiatives which can be embedded in care pathways; and enables providers to have better conversations with people using services, supporting them to make more informed choices.

[Guidance](#)

NHS efficiency map

The HFMA, NHS Improvement and NHS England have worked in partnership to update and revise the *NHS efficiency map*. The map is a tool that promotes best practice in identifying, delivering and monitoring cost improvement programmes (CIPs) in the NHS. As well as additional provider efficiency material the map has now been updated with a number of tools and guidance suitable for commissioning organisations, reflecting increased collaboration and integration.

[Efficiency map](#)

National Tariff Payment System 2019/20

NHS Improvement and NHS England have launched a consultation on *National Tariff Payment System 2019/20*. They are consulting on all aspects of the proposed 2019/20 national tariff. There is a main document containing policy proposals and the draft tariff and a number of supporting documents.

Clinical leadership framework for action

NHS Improvement has published *Clinical leadership – a framework for action: a guide for senior leaders on developing professional diversity at board level*. This guide aims to help leaders working on clinical leadership gain new perspectives on what might be standing in the way of progress, sets out legal and policy considerations, and poses key questions for senior leaders trying to increase the involvement of clinicians. It includes case studies that show how people are already tackling some common barriers.

[Guidance](#)

Assistive technology in research and development

The Department of Health and Social Care has published *Assistive technology research and development work: 2017 to 2018*. This annual report sets out details of government-funded projects supporting the development, introduction and evaluation of assistive technology for disabled and older people.

[Report](#)

NHS App rollout

The *NHS App* is now being rolled out across England. GP practices will need to review some of their system settings before they can go live and enable all the functions of the NHS App. When the GP practice is connected patients will be able to use it to book and manage appointments at their GP practice; order repeat prescriptions; view their GP medical record; check symptoms using NHS 111 online and the health A-Z on the NHS website; register as an organ donor; and choose whether the NHS uses their data for research and planning. Until the GP practice is online patients will be able to use the NHS App to check their symptoms.

[NHS App](#)

Improving the safety of ambulance transfers

The Healthcare Safety Investigation Branch has published *Transfer of critically ill adults: healthcare safety investigation*. This report shows that a lack of national guidance and standard practice for ambulance transfers could be putting patients at risk. It puts forward key recommendations aimed at making ambulance transfers safer for adults that are critically ill.

[Report](#)

Management of health screening

The National Audit Office has published *Investigation into the management of health screening*. This report examines the delivery, performance, oversight and progress in implementing change of health screening programmes in England. The report finds that the proportion of eligible adults receiving health screening is inconsistent across different areas in England and that services are not operating to the 'agreed standards'.

[Report](#)

Polypharmacy

The Royal Pharmaceutical Society has published *Polypharmacy: getting our medicines right*. This document provides a summary of the scale and complexity of polypharmacy. It outlines how healthcare professionals, patients and carers can find solutions when polypharmacy causes problems for patients and points to useful resources that can help. It recommends that all healthcare organisations have systems in place to ensure people taking 10 or more medicines can be identified and highlighted as requiring a comprehensive medication review with a pharmacist.

Medicines Learning Portal

Hospital pharmacists need clinical problem solving skills to deliver medicines optimisation. These skills are required in multiple settings: clinical pharmacy, in the dispensary, in MI, and when on-call. The Medicines Learning Portal helps pre-reg and foundation pharmacists develop these skills by:

- Providing **knowledge** about medicines and covering basic principles of **medicines safety**.
- Showing the right **questions to ask** when problem-solving.
- Recommending **sources of information** about medicines.
- Guiding pharmacists to apply **professional judgement** and **communicate their expert advice**.

Maternity services survey

The Care Quality Commission has published the results from its *Maternity services survey 2018*. The survey of more than 17,000 women who gave birth in February 2018 looked at all aspects of maternity care. The results indicate many women had a good experience, particularly in relation to interactions with staff, access to midwives and emotional support during pregnancy. However, for some women the care they received fell short of expectations with issues highlighted around continuity of care, choice in antenatal and postnatal services and access to help, information and support after giving birth. [Survey](#) Additional link: [CQC press release](#)

State of child health

The Royal College of Paediatrics and Child Health has published *State of Child Health: two years on*. This report sets out progress made against the policy recommendation in the RCPCH State of Child Health 2017 report. It reveals achievements in key areas and a more positive picture for infants, children and young people, however cuts to public health, services and political uncertainty pose substantial threats to progress.

[Report](#)

Reducing childhood obesity

The Department of Health and Social Care has announced that 13 local authorities will receive *funding and support to develop innovative plans to reduce childhood obesity* that can be shared across the country. The local authorities will receive £10,000 in funding as well as targeted support to develop practical plans. The local authorities include City of Bradford and North Yorkshire.

To read more [click here](#)

Childhood obesity

The Department of Health and Social Care has published *Government response to the Health and Social Care Select Committee report 'Childhood obesity: time for action'*. This paper sets out the government's response to the conclusions and recommendations in the report 'Childhood obesity: Time for action'. The response addresses marketing and advertising, price promotions, early years and schools, takeaways, fiscal measures, labelling and support for children living with obesity.

Supporting people with a learning disability and/or autism

The Strategy Unit has published reports presenting findings to date from an *evaluation of the Building the Right Support* plan published in 2015. Building the Right Support is a national plan to provide better support to people with a learning disability or autism. The research is intended to find out what is working, what is not working and what can be done better to support people. The research is due to be completed in summer 2019 after which the final results will be published.

[Report](#)

Asthma care in the UK

Asthma UK has published *The reality of asthma care in the UK: annual asthma survey 2018 report*. This report presents the findings from a survey of 10,064 people with asthma across the UK. The findings include: three out of five people still don't receive basic asthma care; young people receive the worst level of basic care; there is variation in asthma care across the UK; people may be suffering from more asthma attacks than previously estimated; and crucial follow-up after emergency care is still being missed.

[Report](#)

Work and health

Public Health England has published *Health matters: health and work*. This resource brings together data, toolkits and the best evidence of what works in addressing and removing health-related barriers to gaining and retaining employment. It focuses on the actions that can be taken by employers in general, local authorities and the NHS workforce with regards to health and work.

Feedback from Reflection for Professional Development course

Our new reflection sessions are being well received and appreciated already and we have had excellent feedback from those attending - even from those coming in on their day off.

See: <https://twitter.com/musgrovesompar/status/1088816391849984000>

Library Service, MPH @musgrovesompar · Jan 25

"Worth coming in on my day off for!" Great feedback from an attendee at our new 'Reflection for Professional Development' session today. Supports CPD #staffwellbeing and resilience. New spring dates at venues across the county available to book now. @MusgrovePark @SomParNHS

These sessions aim to enable staff to *step back and reflect* on a clinical encounter/event that has affected them at work or at home. Using a guided writing framework attendees will be able to look objectively at the key aspects of the event in order to support professional development and practice, *turning experience into learning*.

We will also explore and reflect on the impact this event has had on a personal level- supporting *staff resilience and wellbeing*.

Numbers are limited and must be booked in advance. Materials will be emailed in advance.

The fearless organisation: creating psychological safety in the workplace for learning, innovation and growth

Amy C. Edmondson 2019

The Fearless Organization: Creating Psychological Safety in the Workplace for Learning, Innovation, and Growth offers practical guidance for teams and organizations who are serious about success in the modern economy. With so much riding on innovation, creativity, and spark, it is essential to attract and retain quality talent--but what good does this talent do if no one is able to speak their mind? The traditional culture of "fitting in" and "going along" spells doom in the knowledge economy. Success requires a continuous influx of new ideas, new challenges, and critical thought, and the interpersonal climate must not suppress, silence, ridicule or intimidate. Not every idea is good, and yes there are stupid questions, and yes dissent can slow things down, but talking through these things is an essential part of the creative process. People must be allowed to voice half-finished thoughts, ask questions from left field, and brainstorm out loud; it creates a culture in which a minor flub or momentary lapse is no big deal, and where actual mistakes are owned and corrected, and where the next left-field idea could be the next big thing.

This book explores this culture of psychological safety, and provides a blueprint for bringing it to life. The road is sometimes bumpy, but succinct and informative scenario-based explanations provide a clear path forward to constant learning and healthy innovation.
