

Settlement agreements and speaking up

NHS Employers has published *Settlement agreements: a factsheet for employers and workers about speaking up*. This resource aims to help employers and workers understand their rights when entering into a settlement agreement. It includes key information around the use of confidentiality clauses and reassures employers and workers who may wish to speak up to ensure high quality safe care is maintained.

[Factsheet](#)

Waiting times and attendance durations in A&E departments

The Strategy Unit has published *Waiting times and attendance durations at English accident and emergency departments*. This report presents a detailed review of the demand-side, supply-side, practice and emergent factors that lead to 4-hour breaches in A&E with a particular focus on changes that have taken place since 2010. It includes insights which have the potential to reshape the perceived wisdom about the performance of A&E departments, carrying implications for healthcare policy and system leadership.

[Report](#)

NHS key statistics

The House of Commons Library has published *NHS key statistics: England, February 2019*. This briefing provides a summary of NHS demand, performance and capacity of services in England including A&E statistics, waiting lists, ambulance data, delayed discharges, and staffing levels.

[Briefing](#)

Developing people - improving care

NHS Improvement has added the following guides to their [Developing People – Improving Care](#) webpage (see **Guides** section towards the bottom of the page):

- Leaders equipped to develop high quality local health and care systems in partnership
- Compassionate, inclusive and effective leaders at all levels
- Knowledge of improvement methods and how to use them at all levels
- Support systems for learning at local, regional and national levels
- Enabling, supportive and aligned regulation and oversight

Public acceptability of health and social care funding

The Health Foundation has published *Public acceptability of health and social care funding options*. This working paper explores the preferences of the general public with regard to the various ways of raising the additional funds that will be needed for health and social care in the UK. The report presents the key findings and draws out policy implications.

GP Contract reform briefing

NHS Providers has published *On the day briefing: five year framework for GP contract reform to implement the NHS long term plan*. This briefing summarises the changes set out in the contract, and explores the potential implications for trusts and their local partnerships with primary care.

[Briefing](#)

General practice premises survey

The British Medical Association has published the results of their *2018 GP Premises Survey* which was conducted as part of the NHS England GP premises review. Around 1000 practices took part in the survey regarding the state of their current premises. Only half of practices considered their premises to be fit for present needs whilst only 2 in 10 practices thought their premises were fit for the future.

The Topol Review: the healthcare workforce and digital technology

The Topol Review: preparing the healthcare workforce to deliver the digital future has been published. This independent review, commissioned by the Secretary of State for Health, outlines how education and training for staff now can deliver a better future for patients and the staff who care for them by implementing technologies such as genomics, digital medicine, artificial intelligence and robotics. It advises on how technological and other developments are likely to change staff roles; what the implications of these changes are for the skills required by the professionals filling these roles; and the consequences for education, training and lifelong learning of current and future NHS staff. To read more [click here](#)

Blueprints - digital innovation

NHS England has announced the first batch of schemes which allow hospitals to implement improvements quicker and more easily to transform care and improve services for patients and staff. The *blueprints* have been created by hospitals on NHS England's Global Digital Exemplar programme which is providing funding to 43 acute, mental health and ambulance trusts to help them digitise.

NHS England publishes comical video promoting the NHS 111 service

NHS England has published a short comical video to promote the NHS 111 service. People can use NHS 111 service to find out what to do and where to go when they have an urgent but non-life threatening medical concern. The campaign encourages people to dial 111 or visit 111.nhs.uk, instead of worrying, self-diagnosing or second-guessing what they should do when they have an urgent health problem. You can watch the video in this article or by visiting the following link: <https://www.youtube.com/watch?v=N1flJsbM4es>

NHS login pilot

NHS Digital has announced the launch of the *NHS login pilot* which aims to build a process to allow partner services to connect and use NHS login. NHS login is designed to make it easier and quicker for patients to see personal health information online. It has already been tested with 3,400 patients as part of the NHS App pilot.

➤ LIBRARY NEWS

Books added to Library stock

Dementia reconsidered, revisited: the person still comes first

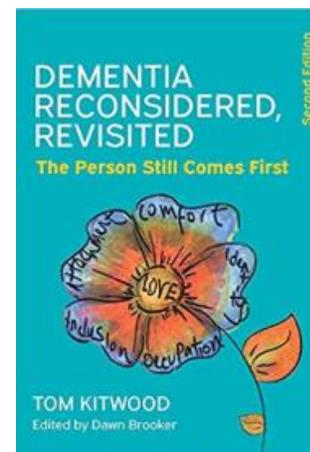

original text by Tom Kitwood; edited by Dawn Brooker. - 2nd ed (2019)

The original Dementia Reconsidered: The Person Comes First by Tom Kitwood was published by Open University Press in 1997. It was a seminal text in the field of dementia studies and is still cited and referenced as core reading on person-centred dementia care. Tom died unexpectedly, just 12 months after the book was published. This book continues to inspire many people to challenge simplistic paradigms about dementia. Since the original book was written, however, there have been many changes in our understanding of dementia.

The editor of this new edition, Dawn Brooker was mentored by Tom Kitwood. She has drawn together a remarkable group of writers to provide a commentary on Kitwood's work. This new edition reproduces the original chapters but provides extra content from subject experts to update the book to a contemporary level.

Dementia Reconsidered Re-visited is an ideal main text or supplementary text for all those studying or working in nursing, medicine, psychiatry, psychology, occupational therapy, social work, adult education, gerontology and health and social care more generally.

A nurse's survival guide to acute medical emergencies

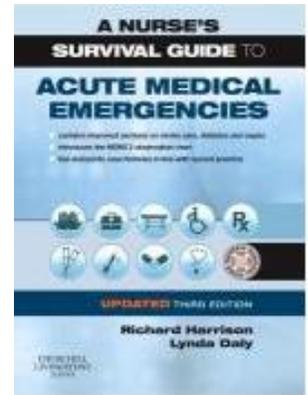

Richard Harrison, Lynda Daly – 3rd updated edition (2019)

Are you a nurse, a physician's associate or a medical student in an acute or emergency unit? This is your indispensable primer of acute medical care - a pocket guide to caring for patients with acute medical conditions.

This book will help you to

- care for patients in the first critical 24 hours of admission
- manage patients using the most up-to-date evidence based approach
- understand the most common emergency medical conditions and their underlying disease mechanisms
- handle the patient's assessment , understand the observations and manage their disease
- easily obtain clear practical advice
- know what to tell the patient and relatives using jargon-free language
- access information on SARS, avian influenza and bio-terrorism

Managing obesity: a practical guide for clinicians

Saffron Whitehead and Gul Bano (2019)

The pandemic of obesity in the majority of countries of the world has become a major health problem: obesity leads to a number of serious diseases including type 2 diabetes, cardiovascular disease, hypertension, stroke, cancer, psychological problems and a poor quality of life. Obesity affects almost every branch of medicine and clinical practice and this puts a huge strain on healthcare provision.

Managing Obesity has been written specifically for non-specialists (GPs, junior doctors and medical students) who increasingly need to treat obese patients. The book begins with an overview of the causes of obesity, the mechanisms that lead to individuals becoming obese and the health issues associated with being obese. Later chapters discuss how obesity can be managed, including advanced pharmacotherapy options and surgery.
