

## Respiratory Conditions

Tackling respiratory conditions becomes an ever-increasing priority for the NHS, as they form some of the biggest causes of death in the UK as well as significantly impact upon healthcare costs, winter pressures and productivity. With the right knowledge, health professionals can work towards improved diagnosis and help patients manage their conditions effectively. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, providing your staff with research, information and tips that will support both their work and the quality of care for their patients.
