

Mental Health (Children and Adolescents)

Ensuring optimal care for mental health is an increasingly important concern for healthcare professionals today. It is essential for maintaining the long-term physical health and well-being of patients of all ages – children, adolescents and adults. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, thereby providing your NHS staff with research, information and tips that will support both their work and the care of their patients

British Journal of Nursing

- A literature review of the psychological status of asylum-seeking children: implications for nursing practice
