

Infection and Infection Control - 2

It is becoming increasingly important that staff, patients and visitors work together to minimise as much as possible the risk of infections within healthcare settings. Thorough prevention and control measures not only greatly reduce infection risk to patients but also ensure greater patient comfort and more effective use of NHS resources. We have provided a list of relevant articles from MA Healthcare journals dealing

with this area, thereby providing your NHS staff with research, information and tips that will support both their work and the care of their patients.
