

Safeguarding in Patient Care - 2

As the NHS works towards improved safety and quality in patient care, the issue of safeguarding takes a more prominent role in the work of all professionals. So that patients of all ages and backgrounds can be respected, treated in a safe environment and be protected from avoidable risks, it is vital for professionals to work with prevention and patient empowerment in mind. We have provided a list of relevant articles from MA Healthcare journals dealing with this area, providing

your staff with research, information and tips that will support both their work and the quality of care for their patients.

British Journal of Healthcare Assistants

- Assisted suicide for patients with terminal illnesses: should the law change?
